Date of Birth: August 23, 2002

PROFESSIONAL SUMMARY

Detail-oriented Software Engineer and AI Contractor with over 2 years of experience contributing to Machine Learning and Natural Language Processing (NLP) projects through high-precision data annotation, linguistic analysis, and Reinforcement Learning from Human Feedback (RLHF).

Experienced full-stack developer specializing in designing and deploying scalable software solutions, with strong expertise in backend development, API design, database systems, and algorithmic problem solving. Proven ability to build reliable systems including financial platforms, automation pipelines, web scraping solutions, data extraction tools, and real-time applications.

Mobile developer with experience building Android applications using Flutter, Java, and Kotlin while maintaining clean architecture and cross-platform code practices.

PROFESSIONAL EXPERIENCE

Software Developer (Amtech Technologies Limited.) – Onsite | June 2024 – Present

- Design and develop high-accuracy algorithms and backend logic for financial and accounting systems.
- Build, modernize, and scale RESTful APIs to integrate with third-party service providers and external platforms.
- Develop mobile and web applications for enterprise management systems, including financial accounting and reporting modules.
- Deploy and maintain applications across multiple environments including Google Play Store, virtual servers, and on-premise infrastructure.
- Configure network rules, traffic routing, and load-balancing strategies to improve reliability, reduce server timeouts, and optimize system performance.
- Maintain high code quality through adherence to development standards, testing practices, and accuracy guidelines.

AI Task Contributor (Independent Contractor) Outlier AI (Smart Ecosystem, Inc.) – Remote | January 2025 – Present

- Perform high-accuracy data labelling, linguistic judgments, and content evaluation tasks for machine learning training and validation.
- Maintain consistently high-quality work through strict adherence to community and accuracy guidelines.
- Collaborate with internal task reviewers and adapt quickly to updated instructions and project needs.
- Handle confidential and proprietary datasets in compliance with strict security and non-disclosure requirements.
- Utilize proprietary annotation tools and systems to complete and submit assignments efficiently.

Freelance AI Evaluator / Data Annotator (Appen, Remotasks, Upwork) – Remote | June 2022 – December 2024

- Contributed to a variety of AI training datasets, including natural language prompts, image classification, and audio transcription.
- Automated tasks using python and selenium to create scalable solutions for various web sites and actions.
- Used python libraries like beautiful soup and pandas to aggregate and analyse data.
- Analysed and corrected AI-generated responses to improve large language model (LLM) performance and factual accuracy.
- Regularly met performance KPIs such as response accuracy, task volume, and on-time completion.
- Identified and flagged "edge cases" in data to assist engineers in refining model edge-case handling.

CORE SKILLS

- **Data Annotation & Tagging:** Semantic labelling, NER, and Sentiment Analysis.
 - **Software development:** Creating solutions to existing problems.
 - **Android Development:** Build android and web apps using flutter, java and Kotlin that work on multiple platforms independently.
 - **Python Automation:** Using selenium and other libraries to automate web tasks.
 - **Quality Assurance:** RLHF Ranking, Fact-Checking, and Task Review.
 - **NLP & LLM Evaluation:** Prompt testing and hallucination detection.
 - **Efficiency:** Fast typing speed and extreme attention to detail in remote workflows.
-

EDUCATION

Bachelor of Computer Science University Of Eldoret , Kenya. Graduated 2024 – April.

CERTIFICATIONS

- **AI/ML Fundamentals** – Coursera / Udemy
 - **Data Labelling Best Practices** – Professional Certification
 - **Advanced Prompt Engineering** – Internal Platform Certification
-

ADDITIONAL INFORMATION

- **Availability:** Available for remote, flexible, and high-volume assignments.
- **English Proficiency:** C-1 level English Proficiency.
- **Compliance:** Comfortable with sensitive or complex content under NDA; fully compliant with all Terms of Use.
